Market Data Risk; Waiver of Liability; Limitation of Liability

This disclosure describes the sources, limitations, permitted use, and risks of market data available through Ainvest's websites, applications, and related services. Please read it before relying on displayed data or placing a trade. "Customer" or "you" means the person using these services.

Market Data Providers and Scope

Ainvest utilizes Nasdaq, Inc. and its subsidiaries and affiliates ("Nasdaq"), and Cboe Global Markets, Inc. and its applicable subsidiaries and affiliates ("Cboe"), including the Cboe One Feed, as market data sources. Nasdaq, Cboe, and other exchanges, securities associations, information processors, vendors, and suppliers whose data is made available through Ainvest are collectively referred to as "Market Data Providers." Market data includes quotations, trades, prices, volumes, indices, historical information, news, and information derived from these sources. Available data may vary by security, service, subscription, and entitlement.

The Cboe One Feed aggregates quote and trade information from the Cboe BZX, BYX, EDGX, and EDGA U.S. equities exchanges. Cboe One quotes and last-sale information do not represent quotations and trades from all U.S. market centers and may differ from the national best bid and offer ("NBBO") or consolidated last sale. Certain fields, such as national cumulative volume, may incorporate consolidated market information. A real-time feed covering selected exchanges should not be treated as a complete view of the national market.

Accuracy Timing and Completeness

Market data may be real-time, delayed, indicative, historical, or a snapshot, depending on the source and service. "Real-time" does not mean instantaneous or free from transmission or processing delays. Quotes, charts, watchlists, portfolio values, and other displays may update at different times, use different sources, or reflect different trading sessions. Aggregation, caching, rounding, corrections, canceled trades, corporate

actions, and vendor methodologies may cause discrepancies. Check available source labels, timestamps, and delay notices; a displayed value may be stale even if no error message appears.

Neither Ainvest nor any Market Data Provider guarantees the timeliness, sequence, accuracy, completeness, reliability, or continued availability of market data. Data may contain errors or omissions and may be revised without prior notice. Historical data and charts may use adjusted prices and may differ from actual transaction records.

Trading and Valuation risks

Displayed prices, bid and ask sizes, last trades, and account valuations are informational and do not guarantee that an order can be executed at a displayed price or quantity. Available liquidity and prices may change before an order reaches a market, particularly during volatility, thin trading, trading halts, or extended hours. Market orders may execute at materially different prices; limit orders may not execute. Displayed data is not an order confirmation, and an interrupted or frozen quote display does not establish whether an order was received, executed, canceled, or rejected. Review order status and trade confirmations before submitting a replacement or duplicate order.

Market data and third-party content are provided for informational purposes and do not, by themselves, constitute a recommendation, solicitation, or personalized investment, legal, or tax advice. Third-party views are not necessarily Ainvest's views. Customers remain responsible for evaluating information and their investment decisions. All investments involve risk, including loss of principal. Past performance does not guarantee future results, and diversification does not assure a profit or protect against loss.

Access may be delayed, degraded, interrupted, or unavailable because of maintenance, heavy demand, exchange or vendor outages, telecommunications or power failures, equipment or software malfunctions, cybersecurity incidents, or events beyond reasonable control. Ainvest or a Market Data Provider may change, restrict, suspend, or discontinue a feed or access to data, subject to applicable law and agreements. Advance notice may not be possible. Do not assume that a price remains current during an outage.

Proprietary Rights and Permitted Use

Market Data Providers retain their proprietary rights in their data. Access does not transfer ownership or grant rights beyond the applicable license. Use market data only as permitted by your subscription and applicable provider agreements. Unless expressly authorized, do not redistribute, resell, publish, sublicense, or provide data to others, or use it for automated extraction, non-display processing, or creation of commercial data products. Where applicable, provide accurate professional or nonprofessional subscriber information and promptly report changes affecting eligibility. Separate exchange or provider agreements and restrictions continue to apply; this disclosure does not replace them or expand any license.

Disclaimer of Warranties

To the fullest extent permitted by applicable law, market data is provided “as is” and “as available,” without express, implied, or statutory warranties, including warranties of merchantability, fitness for a particular purpose, accuracy, completeness, and noninfringement. Neither Ainvest nor any Market Data Provider warrants that data or access will be uninterrupted or error-free. Use of market data is at the Customer’s risk, subject to the protections described below.

Third-party Data provided on Ainvest Applications do not reflect the views of Ainvest. The Ainvest product features are designed for informational purposes only and are not intended to serve as recommendations to customers to buy or sell any securities.

Limitation of Liability and Indemnification

To the fullest extent permitted by applicable law, Ainvest, the Market Data Providers, and their respective officers, directors, employees, and agents will not be liable for losses arising from errors, inaccuracies, omissions, incorrect sequencing, delays, or interruptions in market data or its transmission or availability, including trading losses, lost profits, lost opportunities, or indirect, incidental, special, consequential, or punitive damages, whether a claim arises in contract, tort, or otherwise. These limitations do not apply to a party’s fraud, gross negligence, or willful misconduct, or to liability that cannot lawfully be excluded or limited.

To the extent permitted by applicable law, Customer agrees to indemnify and hold harmless Ainvest and the Market Data Providers and their respective officers, directors, employees, and agents against third-party claims, damages, and reasonable expenses arising from Customer's unauthorized redistribution or other unlawful use of market data, or material breach of applicable data use restrictions. This indemnity does not apply to the extent a claim results from the indemnified party's fraud, gross negligence, willful misconduct, or violation of applicable law.

Preservation of Customer Rights

Nothing in this disclosure waives or limits any right or remedy under federal or state securities laws or other applicable law that cannot lawfully be waived, or relieves a broker-dealer of applicable regulatory obligations, including best execution. If a provision is unenforceable, the remaining provisions apply to the extent permitted by law. This disclosure supplements applicable customer and market data agreements and does not supersede mandatory exchange or provider terms.
